hereinafter **Founders1**

Draft · 14 September 2026

Founders1 GmbH ("Founders1") operates **BetterCo**, the platform through which it procures company registry documents and structured registry data from official registers and other procurement routes, holds them, and delivers them with provenance. Throughout this Agreement, *Founders1* is the contracting party and *BetterCo* is the service STP connects to. STP supplies software and information services to legal, notarial and tax practices and wishes to offer that service to its clients in its own name. Annex 1 describes the service; this Agreement sets the terms on which STP resells it.

1 Definitions

- 1.1 Affiliate** — an undertaking affiliated with a party within the meaning of §§ 15 ff. AktG. **Septeo Group** — Septeo SAS and its Affiliates.
- 1.2 Case** — one order for one company in one jurisdiction, as defined in Annex 1.
- 1.3 Documents** — the registry documents and structured registry data delivered under a Case, together with their provenance metadata.
- 1.4 End Client** — a client of STP or of a Permitted Affiliate to whom the service is resold.
- 1.5 Platform** — the BetterCo platform, its API, and the coverage and routing data behind it.

2 Subject matter

- 2.1** Founders1 provides the service described in Annex 1. STP resells it in its own name and for its own account.
- 2.2** The Annexes form part of this Agreement. In case of conflict, this Agreement prevails over the Annexes, and Annex 1 prevails over the remaining Annexes.
- 2.3** STP's general terms and conditions of purchase do not apply, including where STP refers to them in an order or acceptance.

3 Grant of rights

- 3.1 Resale right.** Founders1 grants STP the **non-exclusive**, non-transferable right, for the term of this Agreement, to market, sell, invoice and deliver the service to End Clients **in its own name and for its own account**.
- 3.2 API licence.** Founders1 grants STP the non-exclusive right to access and use the API for the purpose of clause 3.1. This is not a licence to the Platform, to the coverage and routing data, or to the jurisdiction and document-kind classification.
- 3.3 Own brand.** STP presents the service under its own name and brand. This Agreement grants no licence to any mark of Founders1, and no authority to act for Founders1 or to make representations about the service beyond Annex 1.
- 3.4 Field of use.** The rights under clause 3.1 apply to the provision of company-information, onboarding, KYC/AML and client-file services to professional End Clients. Professional End Clients include legal, notarial and tax practices, and **regulated institutions such as banks, payment and financial services institutions, insurers and funds**, in each case using the service to discharge their own obligations in respect of their own customers, counterparties and suppliers. The rights do not extend to resale to data vendors, data brokers, or providers of competing registry-aggregation services, nor to an End Client providing the service or the Documents onward as a service to its own customers (clause 3.5, Annex 5).
- 3.5 End Client rights.** STP may grant each End Client a non-exclusive right to use the Documents delivered for that End Client for its own KYC/AML, onboarding, advisory and record-retention purposes. **Each End Client may retain those Documents for as long as its statutory retention obligation requires, including after this Agreement ends** (Annex 5). Beyond that, the rights follow what Founders1 holds in the underlying content; Founders1 states the applicable scope with each Document.
- 3.6 Non-exclusivity.** Founders1 remains free to provide the service directly and through other resellers, in any market, including to clients of the kind STP serves.

4 Septeo Group scope

- 4.1** Members of the Septeo Group may exercise the rights under clauses 3.1 to 3.5 as **Permitted Affiliates**. STP notifies Founders1 in text form of the affiliate to be admitted; it becomes a Permitted Affiliate upon confirmation by Founders1, which will not be unreasonably withheld. Admitted affiliates are listed in Annex 4.
- 4.2** STP remains the **sole contracting and billing party**. All orders are placed through STP's account and all invoices are issued to STP. Founders1 enters into no contractual relationship with a Permitted Affiliate.
- 4.3** STP is liable for the acts and omissions of Permitted Affiliates under this Agreement as for its own.
- 4.4** An entity leaving the Septeo Group ceases to be a Permitted Affiliate at that point. Clause 3.5 remains unaffected for Documents already delivered.

5 Restrictions

- 5.1** Documents are delivered for the file of the individual End Client. STP will not redistribute them beyond that file, will not resell or license the structured data as a dataset, and will not perform bulk extraction.
- 5.2** STP will not use the Documents, the coverage classification, or the availability information **actually obtained from Founders1** to build, train, operate or supply a competing registry-aggregation, coverage or document-procurement product, whether itself or for a third party. This obligation binds STP and those Permitted Affiliates that receive such information, during the term and for **24 months** thereafter.
- 5.2a** Clause 5.2 does not restrict the use of information that is public, independently developed, or lawfully obtained from another source, nor the unaided use of **general knowledge, skills and experience** retained in the memory of individuals who have had access to it.
- 5.3** STP will not cache or store Documents in order to serve later orders of End Clients outside the re-use mechanism set out in Annex 1. Retention in the End Client's own file under clause 3.5 is unaffected.
- 5.4** Sub-distribution is permitted only under clause 4.
- 5.5** Reverse engineering of the Platform or API is permitted only within the limits of mandatory law (§ 69e UrhG).

6 Procurement routes and non-circumvention

- 6.1** The identity of the **suppliers and procurement routes** through which Founders1 procures, and the routing of jurisdictions between them, is confidential business information of Founders1. During the term and for **24 months** thereafter, STP will not use that information to identify, approach or contract with those suppliers for services of the kind covered by this Agreement.
- 6.1a** Clause 6.1 does **not** restrict STP from dealing with an **official register or public authority**, from continuing a relationship that existed before the notification concerned, or from dealing with a party it identifies independently of information received from Founders1. STP bears no obligation to verify whether a party it approaches also serves Founders1.
- 6.2** **No End Client identities reach Founders1.** Under clause 8.5 STP reports by its own reference and Founders1 does not require End Client names for settlement. A non-solicitation obligation expressed by reference to identities disclosed through Cases would therefore have no subject matter, and this clause does not rely on one.
- 6.2a** **Standstill on named accounts.** STP may notify Founders1 in text form of named End Clients. For each End Client so notified, Founders1 will not solicit that End Client for services of the kind covered by this Agreement during the term and for **12 months** thereafter. STP may add to or amend the list at any time, and it takes effect on receipt. Founders1's relationships existing at the date of notification, and clause 3.6, remain unaffected.
- 6.3** Founders1 may add, change or discontinue procurement routes at any time, provided the service continues to meet Annex 1.

7 Ordering and performance

- 7.1** Cases are placed and delivered as described in Annex 1. Procurement is **asynchronous**; progress is reported per document kind.
- 7.2** No fixed turnaround time is owed where a jurisdiction is served by a manual registry route. Expected ranges per jurisdiction are stated in Annex 2.3. Founders1 notifies STP where a Case materially exceeds the stated range.
- 7.3** Founders1 targets an API availability of **99 % per calendar month**, excluding announced maintenance and unavailability of a register or route.
- 7.4** Founders1 may decline or abort a Case where the register is unavailable, the jurisdiction or document kind is not covered, or the order would breach applicable law or sanctions (settlement: clause 8.7).

8 Revenue share, invoicing, price changes

- 8.1 STP sets its prices towards End Clients at its own discretion.** Founders1 does not prescribe an end-client price and does not publish one.
- 8.2 Revenue share.** For every Case, the **Net Amount** is the amount STP invoices to the End Client for that Case — net of VAT and of documented credits and refunds — **less the procurement cost** for that jurisdiction under Annex 2.1. STP pays Founders1 that procurement cost **plus 50 % of the Net Amount**, and retains the other 50 %. The procurement cost is thus borne by the Case before the parties share what it earns, and each party carries half of it.
- 8.3 Floor.** Where the amount STP invoices to the End Client for a Case does not exceed the procurement cost for that jurisdiction, STP pays Founders1 that procurement cost and no share arises under clause 8.2. No Case is settled below cost, and in no event does Founders1 owe STP a share.
- 8.4 Minimum.** Founders1's **share** — the amounts payable to it under clauses 8.2 and 8.3 less the procurement cost reimbursed in them — totals at least **EUR 750 per month for the first three full months** after the effective date, and **EUR 1,500 per month** thereafter. No minimum accrues for a partial first month. Any shortfall is invoiced with the following month.
- 8.5 Reporting and invoicing.** STP reports monthly, per Case, the amount invoiced to the End Client. STP may identify the End Client by its own reference rather than by name; Founders1 does not require End Client identities for settlement. Founders1 invoices monthly in arrears on that basis, itemised per Case. Payment is due **14 days** net; amounts are exclusive of VAT at the statutory rate. Once a year Founders1 may ask STP to reconcile the reported amounts against its billing records.
- 8.6 Cost changes.** The procurement costs in Annex 2.1 are fixed for **12 months** from the effective date, **except for any jurisdiction that Annex 2.1 states is not on a tier**, for which the cost is provisional until a schedule is agreed; thereafter Founders1 may change them on 60 days' notice. Where a register or route changes its own fees, Founders1 may adjust the affected jurisdiction on 30 days' notice, evidencing the change; STP may then terminate that jurisdiction within 14 days of the notice.
- 8.7 Cases that deliver no Document.** Where Founders1 declines or aborts a Case under clause 7.4 before procurement, nothing is charged. Where a Case is procured and the register holds no such document, so that the answer is a definitive „not available“, STP pays the procurement cost for that jurisdiction; no share arises. Where a Case fails for reasons within Founders1's control, nothing is charged. Amounts payable under this clause are reimbursements and do not count towards the minimum in clause 8.4.

9 STP's obligations

- 9.1 Pass-through.** STP ensures that its terms with each End Client include, in substance, the terms set out in **Annex 5**, and grants no End Client rights exceeding clause 3.5. STP is free to choose its own wording and to include those terms in its general terms of business; it does not have to reproduce Annex 5 verbatim or disclose this Agreement. Annex 5 obliges STP; it creates no direct contractual relationship between Founders1 and an End Client.
- 9.2** STP provides first-level support to End Clients. Founders1 provides second-level support to STP during business hours.
- 9.3** STP makes no statements to End Clients about coverage, evidence value, currency or turnaround that go beyond Annex 1.
- 9.4** STP informs Founders1 without undue delay of End Client complaints concerning the content or provenance of a Document.
- 9.5 Regulated End Clients.** Where an End Client is subject to supervisory requirements on outsourcing or on ICT third-party risk, STP meets those requirements towards that End Client itself. STP does not agree on Founders1's behalf, and does not represent that Founders1 has agreed, to audit or inspection rights, to disclosure of procurement routes or sub-suppliers, to exit or transition assistance, to incident-reporting or notification periods, or to entries in a register of information, unless Founders1 has agreed in writing. Founders1 will consider such a request in good faith, and will not unreasonably refuse what the End Client's supervisory position genuinely requires. Towards the End Client, **STP is the supplier**: STP contracts with the End Client in its own name and for its own account (clauses 2.1 and 3.1), Founders1 is STP's own supplier and has no contractual relationship with the End Client, and parties Founders1 engages for procurement are Founders1's sub-suppliers — not STP's and not the End Client's — consistent with clauses 6.1 and Annex 3.1.
- 9.6 Supervisory cooperation.** Where an End Client's supervisory position genuinely requires information or undertakings from Founders1, STP requests them from Founders1 and Founders1 provides, within a reasonable period: its service and security documentation, the information needed for the End Client's register of information in respect of Founders1 as STP's supplier, notification of ICT incidents affecting the service, and reasonable support for STP's own exit planning. Audit and inspection rights are exercised **through STP** and are satisfied in the first instance by documentation, by a third-party certification or report where held, or by a pooled audit serving several of STP's clients. An on-site audit at Founders1 requires reasonable notice, is limited to the service, may be conducted by an independent auditor bound to confidentiality, and does not extend to the identity of procurement routes (clause 6.1). Founders1 may charge its reasonable cost for effort going beyond the documentation named above.

10 Data protection

- 10.1** Documents contain personal data of directors, shareholders and beneficial owners. The parties act as **independent controllers** within the meaning of Art. 4 No. 7 GDPR. This Agreement establishes no processing on behalf of a controller under Art. 28 GDPR.
- 10.2** Each party is responsible for the lawfulness of its own processing, for its own information duties, and for assessing its own reliance on Art. 14 (5) GDPR.
- 10.3** The arrangement under Art. 26 / Art. 14 GDPR and the technical and organisational measures are set out in Annex 3.
- 10.4** Each party informs the other without undue delay of a personal data breach affecting data received from the other, and forwards data-subject requests that the other must answer.

11 Confidentiality

- 11.1 Each party keeps the other's confidential information secret and uses it only for the purposes of this Agreement, during the term and for **five years** thereafter. The procurement costs in Annex 2.1, and the information covered by clause 6.1, are confidential.
- 11.2 The obligation does not apply to information that is public, was already lawfully known, is independently developed, or must be disclosed by law or authority; in the last case the other party is informed in advance where permitted.

12 Warranty

- 12.1 Founders1 warrants that it procures with professional diligence and that the **provenance metadata** delivered with each Document — source reference, retrieval date, content date, evidence level, version — is accurate.
- 12.2 Founders1 does **not** warrant the accuracy, completeness or currency of the content of the register itself, nor that a given document exists in a given jurisdiction or for a given legal form. What is owed is the classification and the answer set out in Annex 1, including the answer “not available”.
- 12.3 A defect exists where a Document does not correspond to the order or to its provenance metadata. Founders1 remedies it by re-procuring at no charge or by crediting the price of the Case.
- 12.4 **No guarantee.** The undertakings in this clause 12 are contractual obligations. They are **not guarantees (Garantien) or warranted characteristics within the meaning of clause 13.1**, and neither party's conduct is to be construed as assuming one. Liability for their breach follows clause 13.2.

13 Liability

- 13.1 Founders1 is liable without limitation for intent and gross negligence, for injury to life, body or health, under the Produkthaftungsgesetz, for guarantees given, and for fraudulently concealed defects.
- 13.2 In cases of slight negligence Founders1 is liable only for breach of an obligation essential to the purpose of this Agreement, limited to the foreseeable damage typical for this type of contract, and in aggregate per contract year to **Founders1's share under clause 8.2 in the preceding twelve months**. Procurement cost reimbursed to Founders1 under clauses 8.2, 8.3 and 8.7 is a pass-through of third-party cost and does not form part of that amount.
- 13.3 Founders1 is not liable for decisions taken by STP or an End Client on the basis of registry content, nor for the regulatory consequences of an End Client's own AML assessment.

14 Term and termination

- 14.1 The Agreement begins on signature and runs for an initial term of **24 months**. It renews by 12 months at a time unless terminated with three months' notice to the end of a term.
- 14.2 The right to terminate for cause remains unaffected.
- 14.2a **Loss of supply.** Where Founders1 permanently loses the ability to procure in a jurisdiction, it notifies STP without undue delay and that jurisdiction falls away; STP owes nothing further for it. Where this affects jurisdictions accounting for more than half of the Cases placed in the preceding six months, either party may terminate this Agreement on 30 days' notice, and the minimum under clause 8.4 does not accrue after that notice.
- 14.3 On termination the right to place Cases ends. **Clause 3.5 survives for Documents already delivered.** STP may export its Case records for 90 days. Clauses 5, 6, 10, 11 and 13 survive, clauses 5.2 and 6.1 for the periods stated in them.
- 14.4 Documents held by Founders1 are retained and deleted according to the retention rules in Annex 1.

15 Final provisions

- 15.1** Amendments require written form, including any amendment of this clause. There are no side agreements.
- 15.2** Neither party may assign this Agreement without the other's consent, which will not be unreasonably withheld. Consent is not required for an assignment to an Affiliate. For an assignment to a successor in the business concerned, consent may be withheld where the successor is a competitor of the other party in the services covered by this Agreement.
- 15.3** German law applies, excluding the UN Convention on Contracts for the International Sale of Goods. Place of jurisdiction is **Frankfurt am Main**.
- 15.4** Should a provision be or become invalid, the remainder stays in force.
- 15.5** **Independent parties.** STP acts as an independent reseller in its own name and for its own account (clause 2.1), sets its own prices (clause 8.1), bears the credit risk on its End Clients, and decides for itself whether and on what terms to conclude. This Agreement establishes no commercial agency (Handelsvertreterverhältnis), no commission agency (Kommission), no partnership, no joint venture and no company under German law. Neither party may bind the other. STP is not obliged to transfer its End Client base to Founders1 during the term or on termination; information about End Clients transmitted under clause 8.5 serves settlement and audit only, is limited to STP's own references rather than End Client names (clause 8.5), and is subject to clauses 6.2 and 6.2a.
- 15.6** Annexes, each forming part of this Agreement:
- Annex 1** Service description and reseller use
 - Annex 2** Jurisdictions, procurement costs, surcharges, turnaround and end-client rights
 - Annex 3** Data protection arrangement between independent controllers
 - Annex 4** Permitted Affiliates — empty at signature
 - Annex 5** End-client terms to be passed through

Service description and reseller use

Founders1 GmbH — STP Business Information GmbH · Draft, 14 September 2026

1.1 What the service provides

Founders1 supplies **company registry documents and registry data** for the jurisdictions listed in Annex 2, through BetterCo. Per company — one **case** — Founders1 procures and delivers:

- › the **registry extract**, the **articles of association** and, where the register evidences it, the **shareholder record**, together with the structured registry data;
- › for every document: the source reference at the register, the **retrieval date** and, where the document carries one, the **content date**, the document version, the evidence level, and — where the document allows it — a machine-readable text layer, since registry documents are frequently scans without one;
- › an explicit answer where a document does not exist.

1.2 Evidence level

Not every document that carries an item of information is also evidence of it. Each delivery therefore states an **evidence level**:

LEVEL	MEANING	EXAMPLE
data	an item of information, not a document — never evidence in itself	structured shareholder particulars
document	a document actually filed with the register, without a seal	articles of association from the register
certified	issued and sealed by the registry authority	Kbis, certified commercial register extract

STP does not have to specify the level when ordering. Where more than one level is obtainable for a document kind in a jurisdiction, Founders1 delivers the highest obtainable level and labels it. An apostille is a property of a certified document, not a fourth level.

1.3 Availability

Availability is classified per jurisdiction × legal form × document kind. Exactly one of four cases applies, and the fourth is a definitive answer rather than an error:

CASE	MEANING	PRICE EFFECT
Base document	part of the standard retrieval	included in the base price
Additional document	held by the register, not part of the standard retrieval	surcharge per Annex 2
Data only	no document, but structured particulars from the register	included in the base price
Not available	not obtainable in this jurisdiction for this legal form	no charge where this is known before procurement; where a Case had to be procured to establish it, clause 8.7 applies

One point of supply

STP reads exclusively from BetterCo. The procurement routes behind it are not visible or addressable — not as an endpoint, a field name, or a status value.

BetterCo is the system of record: documents are held, versioned and re-served there. When Founders1 adds or changes a procurement route, STP sees it in cost and provenance — **not in code**.

1.4 How STP uses the service with its clients

STP integrates the service into its own onboarding, KYC and client-file workflows and offers it to its clients under its own name. Founders1 does not appear towards the end client and has no contractual relationship with them. Per end-client company:

- 1 STP opens a case: jurisdiction, legal form, company identifiers and the document kinds required.
- 2 Procurement runs **asynchronously**. Some routes take minutes; manual registry routes take hours to days. Progress is reported by callback, and each document kind carries its own state:
 - › **requested** — the document kind has been asked for
 - › **ordered** — procurement has been triggered
 - › **delivered** — the document has arrived at BetterCo
 - › **stored** — it is held and retrievable by STP
 - › **failed** or **not available** — the two end states that carry no document
- 3 STP retrieves the documents and their provenance from BetterCo and files them in the client's file. Case and document identifiers are BetterCo identifiers and stay stable across a change of source.
- 4 Where a document of the required kind is already held for that company and still current, it is re-served without a new procurement and without a new charge. Founders1 determines the currency criteria per jurisdiction and document kind and notifies them to STP.
- 5 Where the register provides it, each document carries two dates: the **retrieval date** and the **content date**. They are often not the same — a shareholding statement retrieved today may reproduce a much earlier filing. Founders1 delivers both wherever the documents allow, and suggests that STP's own currency rules build on the content date where its process permits.

Jurisdictions, prices and end-client rights

Founders1 GmbH — STP Business Information GmbH · Draft, 14 September 2026

2.1 Price tiers

The price depends on the jurisdiction, not on the number of documents. One case covers the standard retrieval with all base documents and the structured data, whether that is one document or five. Every covered jurisdiction sits in one of four **price tiers**, and each tier carries a **procurement cost** per case.

The **procurement cost** per case for each tier is set out below. Where this Agreement refers to „the procurement cost for that jurisdiction“, it means the amount stated here for the tier to which Annex 2.2 assigns that jurisdiction. The amounts are **changed only under clause 8.6**: not before twelve months have run, then on 60 days' notice, and for a change in a register's own fees only on 30 days' notice with evidence of the change and STP's right to terminate the affected jurisdiction. They are confidential under clause 11.

TIER	PROCUREMENT COST	LIST PRICE (FOR INFORMATION)	JURISDICTIONS
A	10,80 €	15,00 €	104
B	26,70 €	35,00 €	35
C	54,50 €	70,00 €	12
D	70,50 €	90,00 €	1

A case that has to be worked manually carries a surcharge, notified in advance under Annex 2.3. All amounts are net of VAT. The list price column is shown for orientation only and is not the basis of any settlement.

United States is not on a tier. It has no single national register: company records are filed with each state, and availability is determined per state. Its cost is agreed separately and remains provisional under clause 8.6; Annex 2.2 marks it accordingly.

2.2 Covered jurisdictions

153 jurisdictions are covered, together with 26 named sub-registers listed at the end. The **highlighted** entries are STP's fifteen priority jurisdictions; the letter is the price tier per section 2.1, and — marks a jurisdiction that is not on a tier. Where a jurisdiction has no single national register, it is covered only through the sub-registers named below.

Surcharges, turnaround and end-client rights

2.3 Surcharge for additional documents

Where a document kind is an *additional document* in the sense of Annex 1.3, a **surcharge** applies on top of the case price. The surcharge differs per jurisdiction and per document kind.

- › Founders1 notifies the applicable amount before it applies. **A surcharge that has not been notified to STP in advance is not charged.**
- › Founders1 notifies a new or changed surcharge at least 30 days before it applies.
- › Per jurisdiction, the parties agree whether the additional document is retrieved **with every case** in that jurisdiction, or **only on request** per case. Where nothing is agreed, it is retrieved only on request.

2.4 Turnaround

Procurement is asynchronous. Automated routes typically complete within minutes to hours; jurisdictions served by a manual registry route take longer, and no fixed turnaround is owed for them (clause 7.2). Founders1 states the expected range per jurisdiction on request; where no range has been stated, none is owed.

2.5 End-client rights

What an End Client may and may not do with a Document is set out in **Annex 5**, which also states the terms STP passes through under clause 9.1. The grant itself is in clause 3.5.

Data protection between independent controllers

Founders1 GmbH — STP Business Information GmbH · Draft, 14 September 2026

3.1 Roles

Each party determines the purposes and means of its own processing and acts as an **independent controller** under Art. 4 No. 7 GDPR. Neither party processes on behalf of the other; Art. 28 GDPR does not apply, and no joint controllership under Art. 26 GDPR is established. Each party is separately responsible for the lawfulness of its own processing.

Founders1 decides which route a Case takes, what is retrieved, and how long it is held, and is the controller of that processing along its whole procurement chain; parties Founders1 engages for procurement act as its processors. Delivery to STP is therefore a transfer between two controllers, not a disclosure by a processor.

Founders1 also **holds the documents it procures and re-serves them to other customers** where they are still current (Annex 1.4). It therefore processes for its own purposes and on its own determination, and not solely on STP's instruction, which is what distinguishes this arrangement from processing under Art. 28 GDPR.

3.2 What is processed

DATA SUBJECTS	CATEGORIES OF DATA
Directors and officers	name, function, date of birth, address as held by the register
Shareholders	name, address, shareholding, capital contribution as held by the register
Beneficial owners	name, date of birth, nationality, nature and extent of the interest
Users at STP	name, business contact details, account and log data of the API

No special categories under Art. 9 GDPR are processed. The register content originates from public company registers; Founders1 does not obtain it from the data subject.

3.3 Purposes and legal basis

Processing serves the procurement, delivery and documentation of registry information so that STP and its End Clients can meet their obligations under money-laundering law. Each party relies on its own legal basis, as a rule Art. 6 (1) (b) or (f) GDPR, and for End Clients subject to money-laundering law additionally Art. 6 (1) (c) GDPR.

The information duty under Art. 14 GDPR falls on each party for its own processing. Each party assesses independently whether Art. 14 (5) GDPR applies.

3.4 Technical and organisational measures

- › Encryption in transit (TLS) and at rest for stored documents; access only over authenticated, rate-limited API access bound to STP's account.
- › Role-based access within Founders1, restricted to staff who need it; access to production data logged.
- › Documents and case records are held within the EU/EEA. Founders1 maintains a **list of its sub-processors**, provides it on request and keeps it current, and notifies STP at least 30 days before adding or replacing one. STP may object on reasonable grounds relating to data protection; where the objection cannot be resolved, STP may terminate the affected jurisdictions.
- › Segregation of test and production environments; backups encrypted; restore tested.
- › Retention and deletion follow Annex 1 and clause 14.4.

3.5 Transfers to third countries

Storage is in the EU/EEA (section 3.4). **Procurement is not.** Retrieving a record from a register means transmitting the company identifiers, and where applicable the name of a person searched for, to the jurisdiction of that register. For the jurisdictions covered by Annex 2.2 that necessarily includes third countries without an adequacy decision.

- › Where a transfer is necessary to perform the Case that STP has placed, or to establish or defend legal claims, Founders1 relies on **Art. 49 (1) (b) or (e) GDPR**. Such transfers are occasional, limited to the identifiers needed to address the register, and are not bulk.
- › Documents and case records returned from a register are stored in the EU/EEA. Onward transfer of a Document by Founders1 to a third country does not take place.
- › Founders1 maintains a list of covered jurisdictions outside the EU/EEA and provides it on request. STP may exclude jurisdictions from its own use of the service at any time.
- › **Sanctions.** A jurisdiction appearing in Annex 2.2 is a statement about register coverage, not a representation that a Case in that jurisdiction may lawfully be placed. Each party remains responsible for its own sanctions and export-control compliance, and Founders1 may decline a Case under clause 7.4 on that ground.

3.6 Cooperation

Each party informs the other without undue delay of a personal data breach affecting data received from the other, with the information needed for that party's own notification duties. Data-subject requests are answered by the party that received them; where a request concerns the other party's processing, it is forwarded without undue delay. Each party names a contact point for data protection matters on signature.

Permitted Affiliates

Founders1 GmbH — STP Business Information GmbH · Draft, 14 September 2026

4.1 Admitted affiliates

The following members of the Septeo Group are admitted as Permitted Affiliates under clause 4 and may exercise the rights under clauses 3.1 to 3.5. STP remains the sole contracting and billing party for all of them.

ENTITY	REGISTERED SEAT	REGISTER / NUMBER	ADMITTED ON
—	—	—	—
—	—	—	—
—	—	—	—

This Annex is empty at signature. Admission follows clause 4.1: STP notifies the affiliate in text form, and it is admitted upon confirmation by Founders1. An admission updates this Annex without requiring an amendment to the Agreement.

4.2 Leaving the group

An entity that ceases to belong to the Septeo Group ceases to be a Permitted Affiliate at that point and is struck from this Annex. STP notifies Founders1 without undue delay. Rights already granted to End Clients under clause 3.5 for Documents already delivered remain unaffected.

End-client terms to be passed through

Founders1 GmbH — STP Business Information GmbH · Draft, 14 September 2026

5.1 How this Annex works

Under clause 9.1, STP ensures that its terms with each End Client include, **in substance**, the terms below. STP chooses its own wording and may carry them in its general terms of business. It does not have to reproduce this Annex verbatim, name Founders1, or disclose the Agreement.

This Annex obliges STP. It grants Founders1 no rights against an End Client and creates no contract between them. Where STP's existing terms already cover a point in substance, that point is satisfied.

Where a Document carries a register-specific restriction notified with it under section 5.2 (e), that restriction prevails over anything more permissive in STP's own terms.

5.2 The terms

- › **(a) Purpose.** The End Client may use the documents and registry data delivered for it for its own know-your-customer and anti-money-laundering checks, client and supplier onboarding, advisory work, and its own record-keeping. This includes documents about the End Client's own customers, counterparties and suppliers, obtained to discharge the End Client's own obligations. It does not cover discharging another person's compliance obligations, or providing the documents to another person for that purpose.
- › **(b) Retention.** The End Client may retain what was delivered for it for as long as its own statutory retention obligation requires, including after its contract with STP ends and after the Agreement between STP and Founders1 ends. Beyond that period, and for any use outside the purpose in (a), the rights follow what Founders1 holds in the underlying content; the applicable scope is stated with each Document.
- › **(c) No redistribution.** The documents are for the End Client's own file. The End Client does not pass them on to third parties, does not sell or license the structured data as a dataset, does not publish it, and does not extract it in bulk. Three disclosures are permitted: to its own advisers and auditors bound to confidentiality; to a supervisory authority where required; and to **the company a document concerns**, in connection with the End Client's own check on that company.
- › **(d) No competing use.** The End Client does not use the documents, the registry data or the availability information to build, train, operate or supply a company-data, registry-aggregation or document-procurement product or service for third parties.
- › **(e) Register restrictions.** Some registers restrict what may be done with their content. Where such a restriction is notified with a document, it applies to the End Client and prevails over the permissions above.
- › **(f) The register is the source.** Registry content is reproduced as it was filed or held. Neither STP nor its supplier warrants that the register itself is accurate, complete or up to date, and a document reproduces the state of the register at the retrieval date stated with it.
- › **(g) Data protection.** The documents contain personal data of directors, shareholders and beneficial owners. The End Client is an independent controller for its own use of them and is responsible for the lawfulness of that use, for its own information duties, and for its own assessment of Art. 14 (5) GDPR.
- › **(h) No further rights.** The End Client acquires no rights in the platform, the interface, the coverage and routing data, or the jurisdiction and document-kind classification behind the service.

5.3 Changes

Founders1 may amend this Annex where a register, a supplier or applicable law requires it, on 30 days' notice, evidencing the requirement. STP applies the change to End Client terms concluded or renewed after it takes effect; it does not have to reopen terms already agreed.
